

Non roadway collisions resulted in
1807 deaths
from
2011 to 2021
in US industry.

Follow this five-point plan to keep safe

- 01** Establish and follow site traffic plan. Know haul road traffic patterns and stay on your side of the road.
- 02** Large equipment has right of way, make eye contact or radio contact with operator before approaching.
- 03** If large equipment operator is not certain the way is safe, get an all-clear before moving.
- 04** Identify small equipment using whips and/or flashing lights.
- 05** Use MSHA-approved collision warning technology to reduce accidents.
